

CAP-TURESM

OUR EXPERIENCE BECOMES YOUR VALUE

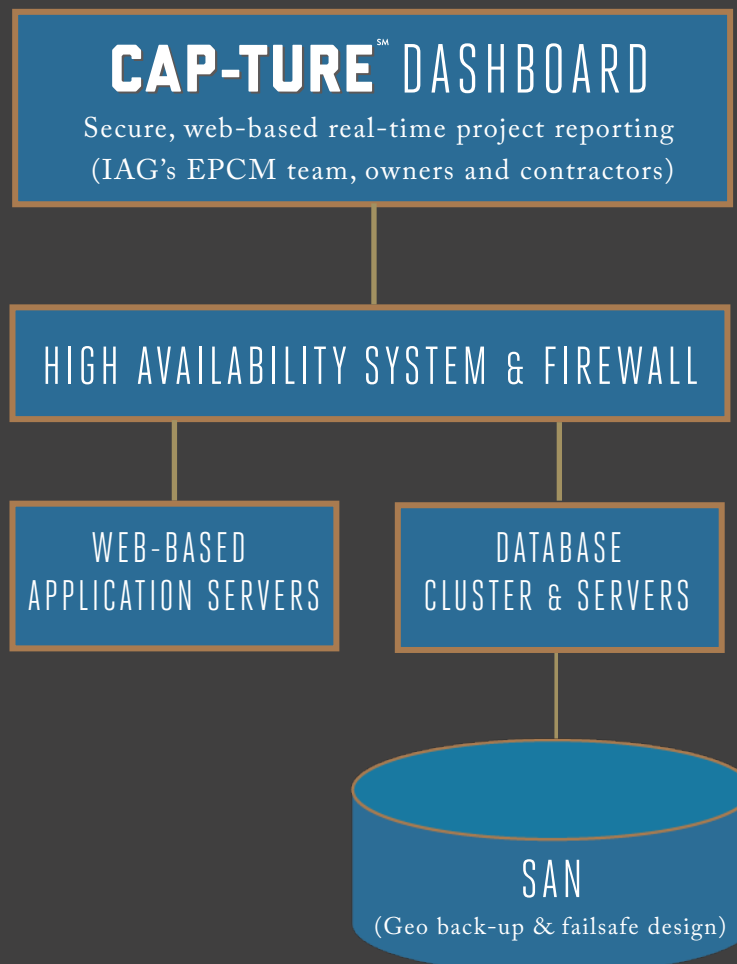

ONE SIZE DOES NOT FIT ALL

IAG's decision to build the CAP-TURESM platform ourselves is in stark contrast to the decisions made by most other EPCM's who lack well-defined and scalable information technology systems.

Or often just as problematic, we see other EPCMs purchase off-the-shelf software products that fundamentally constrain and frustrate their ability to adapt to the dynamic needs of projects and owners in the real world.

Our goal for CAP-TURESM is simple: to arm IAG's team, owners and contractors with an adaptable real-time management dashboard for project development and execution services—where every project comes in on budget, on schedule and on spec...or better.
